

July 6, 2013

We are insisting that you fulfill the enforcement of your job by making broadcasters operate "in the public interest", which by any reasonable definition would mean that profanity, nudity, graphic sex, and similar offensive materials be kept off PUBLIC airwaves. The moral decline of our society by this "open mike" mentality is more important than anything else you could name. Just ask the Roman Empire about what it did to their great society. Oh, I forgot, there is no more Roman Empire.

If someone wants this kind of smut, let them get it on pay for view channels, not on those that can be accessed, often times with us not being able to block them (which we shouldn't even have to do in the first place). Our family does not want to have to put up with this garbage, and we should not HAVE TO put up with it.

Please do your jobs and get this stuff off public airwaves.

Thank you.

Dick and Louise Bejnar

Your on line form is quite difficult to get to, and is not explained well for a "Communications" agency. Is that on purpose?
